One-Pager Project Brief: Green Dignity Villages (GDV)

Problem Statement Rural communities in Kenya's South Rift face poor housing, inadequate sanitation, and unreliable energy access, keeping families trapped in cycles of poverty and disease.

Our Solution The Green Dignity Villages (GDV) model integrates affordable eco-homes, clean water, renewable energy, and green livelihoods to restore dignity and opportunity to families.

Key Components - Eco-Homes: Affordable, durable housing units - Water & Sanitation: Clean water access and eco-toilets - Solar Energy: Off-grid renewable energy systems - Green Livelihoods: Kitchen gardens and cooperative farming (coffee/avocado)

Impact Snapshot - 200+ people gain safe housing per cluster of 20 homes - 100+ youth/women trained in agribusiness - Reduction in waterborne diseases by 60% - 90% access to renewable energy in targeted clusters

Budget Snapshot - \$50,000 builds a GDV cluster of 20 homes - \$2,500 supports water & sanitation per cluster - \$5,000 invests in solar & community agribusiness

How You Can Partner - Fund a GDV cluster or part of it - Co-brand as a corporate partner - Provide technical expertise in housing, energy, or WASH
